

# TimberScan

## Paperless AP Approval for Timberline

### Client Quotes

"We had a number of superintendents that weren't computer literate and there were major concerns early on about getting them up and running. We implemented TimberScan for just a few superintendents and PM's at a time. It was obvious to me in the first week or two that everyone would get it because it was that simple. Now my superintendents and PM's have absolutely no problems using TimberScan. They can even approve invoices from their home. Everyone loves it."

South Side Constructors  
Ed Mc Lelland  
Chief Financial Officer

"TimberScan is definitely worth a look. My thought is that the problems one business has, most businesses are having. In the construction market we're dealing with lots of subcontractors. We're dealing with lots of invoices and lots of approvers. Many people have to verify costs to make sure that there OK. My recommendation is that you should definitely look at TimberScan. In many respects the software is free when you consider the efficiencies that you will get."

Wright Construction Corp.  
Mitch Bueltel  
Chief Financial Officer

"TimberScan is very simple to install and implement. We were up and running very quickly and the benefits we got were huge."

Scott Thomson  
Precept Builders

"With TimberScan we are processing invoices much faster and not losing them. Our revenues are a lot steadier because we are able to get costs into the system much faster than before. Our financials are looking better month by month because we are more efficiently processing our invoices. It's also helping us with our reputation with subcontractors, because invoices are now get processed on a more timely basis."

Precept Builders  
Scott Thomson  
Director of Operations

"When we first considered TimberScan we were given a number of references and we followed up with most of them. The first comment that almost all of them made was '***I don't know how we ever did without it***'. And now that we're on TimberScan I would agree with that."
