## Integrated, End-to-End Job Cost Software

### Based on the JOB!

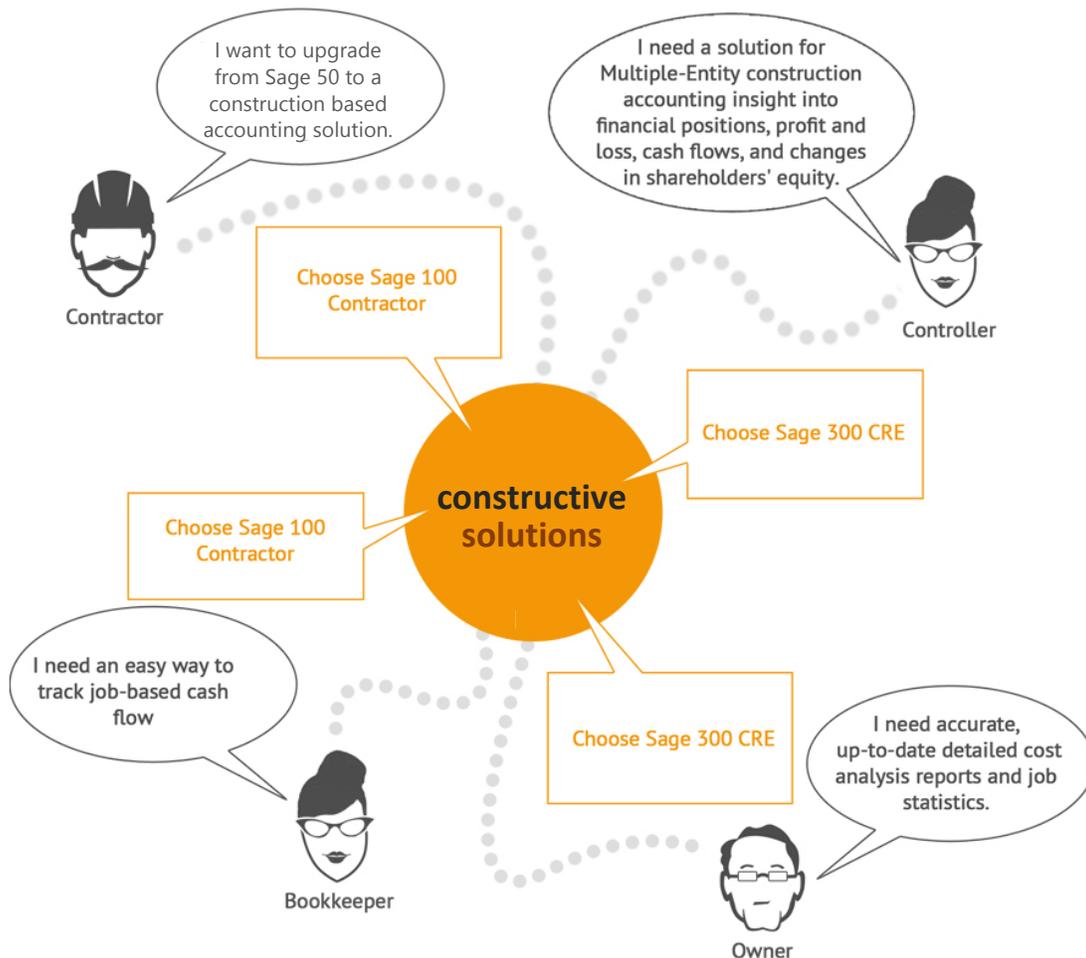

The industry has specific accounting needs not associated with many other businesses, so it's important for construction accounting software to be **based on the JOB**. A construction job-based solution makes sure all the parts of your business are moving together, in the same PROFITABLE direction. Whether you're the GC or the subcontractor, **Sage 300 CRE** (formerly Timberline) or **Sage 100 Contractor** (formerly MasterBuilder) can help you improve profitability, boost revenue, and increase efficiency.

A job's profit is based on **data** that allows you to adjust and adapt to environmental, material, and workforce fluctuations. Connecting financial management with day-to-day operations and project management — gives you the power to manage all stages and variations of the job. Therefore, your software needs to be standardized, yet flexible. That's why Sage Construction and Real Estate (CRE) suite of construction accounting software solutions continues to lead the industry for the best-in-class software.

### Are you a Contractor, Controller, Bookkeeper or Owner?

Whatever your role is, you have a business problem that needs the correct solution. That's where **constructivesolutions** comes in to play - we'll help you figure out which core software works best for your business. You tell us what you need, and we'll give you options for a one-of-a-kind solution. And then we will partner with you for the lifetime of your software.

# Sage 100 Contractor

## Now you can trust your numbers!

Sage 100 Contractor (formerly Sage Master Builder) construction accounting software provides small to mid-sized contractors with the easiest access to critical, end-to-end business and project information. Businesses will be able to make better decisions and manage operations more effectively than when using off-the-shelf accounting software, like Sage 50 or Quickbooks

Owners and Estimators at small- to mid-sized companies **looking to upgrade from basic spreadsheets, yet need an easy-to-use solution, should choose Sage 100 Contractor.** With Sage 100, you can see job costs in real time, get paid faster, create comprehensive budgets, and manage payables to your advantage.

Manage committed costs, manage change orders, and easily develop templates for generating future bids.

By identifying unexpected material costs, overtime hours, and other cost factors, you can make course corrections that maximize profit.

# Sage 300 Construction & Real Estate (CRE)

## Fire up your companies' profits!

Sage 300 Construction and Real Estate (formerly Sage Timberline Office) provides construction and real estate firms with the most complete solution for managing the entire project or property life-cycle with precision, efficiency, and confidence.

Start with the 'core' accounting products in Sage 300 (**GL, AP, AR, Job Costing, Billing, Payroll, Equipment Cost and Remote Time Entry**) and integrate other modules based on your unique business environment (**Project Management, Property Management, Estimating, Reporting, Document Management, and other third-party applications**).

With the core products within Sage 300, you have visibility into your financial health, which allows you to control costs, improve cash flow, and know your current cash position at all times. You can look at the 'big picture' analytics, or drill down to the detail with project financial reports.
