Sage 100 Contractor

CONSTRUCTIVE SOLUTIONS ADDS SAGE 100 CONTRACTOR SOFTWARE FOR CANADIAN CONTRACTORS

VANCOUVER, Canada (June 24, 2013) – Constructive Solutions for Business Inc. announced the addition of Sage 100 Contractor (formerly Sage Master Builder) to their ‘best of breed’ software solutions available to Canadian contractors. Built specifically for the construction industry, Sage 100 Contractor currently provides over 6000 contractors with a single software solution to manage and control every aspect of a construction business from estimating and job costing to project management, service management and more.

Sage 100 Contractor now delivers new capabilities aimed at helping Canadian contractors gain added efficiencies. The latest version of Sage 100 Contractor now offers companies doing business in Canada the ability to process payroll, electronically file government reporting (such as ROE forms, T4s and T5018s), and provide EFT for Payroll and AP. Companies will also be able to handle federal and provincial taxes such as GST, HST and PST and effectively manage holdbacks.

Designed specifically for contractors managing \$5M - \$20M in revenue who have outgrown Sage 50 (Simply) and QuickBooks, Sage 100 Contractor additionally provides companies with mobile access to project information anytime, anywhere through new integration with Sage Construction Anywhere, a cloud-based solution to help companies better manage their field operations.

Constructive Solutions has been implementing Sage solutions in the Canadian marketplace with great success and the addition of Sage 100 Contractor to their portfolio allows them to better meet the needs of smaller contractors. “For years we have been looking for a solution that delivers integrated job costing for this size of contractor. Now we can combine our ‘industry best practices’ with this easy to use solution and help smaller contractors increase profitability and operational efficiency at an affordable price.” says Patrick Baker, President.

With more than 40 years of industry experience, Sage keeps projects moving with the most job-ready and people-connected solutions for construction and real estate. Its 40,000 customers manage more than 400,000 jobs each year with Sage Construction & Real Estate products.

Sage Group plc is a leading global provider of business management software to small and medium sized companies, creating greater freedom for them to succeed. Formed in 1981, Sage was floated on the London Stock Exchange in 1989 and entered the FTSE 100 in 1999. Sage has over 6 million customers and more than 13,380 employees in 24 countries.

Constructive Solutions has been meeting the diverse needs of the Canadian construction & real estate industry for over 14 years. Serving over 400 industry leading clients throughout Canada, the company’s team of dedicated professionals applies industry ‘best practices’ to maximize a client’s investment in their integrated project accounting and management solutions. Leveraging a vast domain expertise, Constructive Solutions provides Canadian customers with Sage Construction & Real Estate software solutions and professional services including: strategic planning, set-up and workflow training, procedural documentation, customized reporting and business intelligence.
