

Construction Project Management Software from Meridian Named as 2012 Constructech Top Products

Constructech Magazine names both Prolog and Proliance Software as top products

FOLSOM, Calif. (March 23, 2012) – Meridian Systems, the Plan-Build-Operate technology solutions leader for project-based organizations, announced today that Prolog® and Proliance® software have been named commercial Top Products by *Constructech* Magazine. Prolog has been named as one of the *Constructech* Top Products in 2008, 2009, 2011. Proliance has been named top product in 2008, 2009 and Meridian Systems was also named as one of the *Constructech* 50 in 2011.

The *Constructech* Top Products honor technology solutions that have demonstrated the greatest innovations geared toward the commercial construction market.

Judging is conducted by the editorial team at *Constructech* magazine, and the products selected are based on various criteria, including the product's overall usefulness and uniqueness to the construction industry as well as customer growth rate during the past few years for the particular product.

“Much has changed in regard to technology solutions available in the five years since we began our annual Top Products awards. The needs of industry professionals have evolved, and today, determining the right solution for your company can be difficult as you wade through a sea of options,” said Mike Carrozzo, chief editor, *Constructech*. “Our 2012 Top Products winners provide solid solutions in areas from mobility to BIM, and so much more. We truly believe these to be some of the best offerings found in the construction marketplace.”

Prolog software is the leading construction project management solution for AEC firms, offering the most complete system of record for capturing and managing project information, from the field to the back office. Prolog is for project managers accountable for construction costs, scope and schedules, and for project teams contributing to the successful delivery of projects. For more information about Prolog, go to <http://www.meridiansystems.com/products/prolog/construction-project-management.asp>.

Proliance software, for facility and infrastructure owners, uniquely combines project and portfolio management, business process management and business analytics into one system of record, enabling large enterprises to track how their real estate, construction and facilities portfolios are performing. For more information about Proliance, go to <http://www.meridiansystems.com/products/proliance/infrastructure-lifecycle-management.asp>.
