

PROLOG

Features offered in Cost Control include:

Feature	Benefit
Budget	Manage budgets, commitments, costs and savings or overruns
Application Integration Software Development Kit	Produce programs that connect your existing accounting system to Prolog [®] Manager
Applications for Payment	Save time by generating requisitions from invoices and change orders
Budget Control Log	Identify exposures, trends and budget transfers
Change Orders	Record changes in Prolog for instant budget updates
Change Order Requests	Reduce the request cycle for change order
Contracts	Write contracts faster using Microsoft [®] Word
Expenditure Authorizations and Funding Assignments	Run reports—by account or funding source— to determine dollars spent from each source
Invoices	Update the cost-to-date project budget automatically when recording invoices
Potential Change Orders	Integrate change management directly into the budget
Purchase Orders	Rapidly generate purchase orders using material catalogue
Revenue Codes	Learn revenue sources by running tracking reports
